

EarthWalk presents the new

MiniMax iPad Series

**Includes
Integrated
iPad Chargers**

Available in 4 capacities

The new MiniMax Series for iPads allows you to securely store, charge, transport and deploy iPads in to the classroom. Available in four sizes to accommodate up to 24, 32, 36 or 48 units.

The EarthWalk MiniMax iPad carts include an additional iPad AC/DC charger which is integrated into each iPad storage compartment. This integrated charger system eliminates the need for electrically wiring and unwiring. While freeing up your existing charger to be used as needed outside the cart in the classroom.

MiniMax iPad carts also feature the new EarthWalk "iSoft" padded shelf liner system to help protect your iPads from accidental bumps and scratches. This padded, horizontal shelf design allows for proper storage for each device and avoids positioning iPads on their edge to help better protect your investment.
